Jl. Inspeksi Kali Sunter No.32, RT.08/RW.4, Klp. Gading Bar., Kec. Klp. Gading, Jkt Utara, Daerah Khusus Ibukota Jakarta 14240

Fresh Graduate in Informatics Engineering with interests in Data Analytics, Machine Learning, and Full Stack Development. Experienced in data processing, analysis, and visualization through various academic and personal projects, as well as in building web applications using modern technologies. Comfortable working across both front-end and back-end development, and continuously improving my skills to contribute to data-driven solutions and digital applications. Open to opportunities in Data Analytics, Machine Learning, or Full Stack Development.

EDUCATION

Universitas Negeri Semarang

Semarang

Bachelor of Informatics Engineering | GPA: 3.62/4.00

August 2022 – May 2026

- Completed core coursework in Algorithms, Data Structures, Artificial Intelligence, Databases, and Computer Networks.
- Developed practical experience through individual and team projects in application development and problem-solving.
- Strengthened analytical thinking, system design, and collaboration through discussions and active project work.
- Conducted research on machine learning for classification, including preprocessing, feature selection, optimization, and evaluation.

PROFESSIONAL EXPERIENCE

Sekretariat Daerah Kota Semarang

Semarang

Full Stack Developer

February 2025 – July 2025

- Built the TAPPEM web platform from scratch, developing its front-end structure and visual design.
- Developed interactive user interfaces to support better user experience in accessing public service information.
- Contributed to making the website more structured, consistent, and easier to use.
- Designed, developed, and integrated front-end and back-end components for web applications.

Infinite Learning Indonesia (MSIB — Independent Study Batch 7)

Batam

Game Artist

September 2024 – December 2024

- Developed 3D games using Unity with a focus on level design and gameplay optimization.
- Collaborated in a team to design and implement gameplay systems and immersive game environments.
- Applied feedback from industry mentors to improve game design and development quality.
- Presented game development outcomes to mentors and peers as part of project evaluation.

ORGANIZATIONAL EXPERIENCE

UNNES GIAT 13 – Juron Village	Sukoharjo
Publication and Documentation	October 2025 – November 2025
- Developed the UMKM Juron website to support the digitalization and promotion of local MSME products. - Managed digital content and publications for UNNES GIAT 13 activities and village programs. - Supported the team in documenting activities and preparing visual content for publication. - Collaborated with the team to document and communicate program activities publicly.	

HONORS & AWARDS

SINTA 5 Journal Article Publication — Jurnal Ilmiah Wahana Pendidikan	2026
- Co-authored a SINTA 5 research article on Multi-Layer Perceptron (MLP) and hyperparameter tuning for NBA player classification. - Contributed to data preparation, model development, and evaluation across different MLP architectures. - Analyzed player statistics to identify optimal model configurations for effective classification performance.	

PROJECTS

Alzheimer’s Disease Classification	2026
Machine learning project for Alzheimer’s disease classification using XGBoost, hybrid feature selection, and hyperparameter optimization to improve model accuracy and evaluation metrics.	
UMKM Juron	2025
Web platform for promoting local products and supporting digital marketing for UMKM in Juron Village.	
iMasjidHub	2025
Modern web platform for managing mosque inventory, financial records, and daily activities.	
TAPEM	2025
A web platform that provides accessible public services and information with a focus on usability and efficiency.	
Farmer's Journey	2024
3D action game focused on combat and resource collection to repair and upgrade a house.	

TECHNICAL SKILLS

Programming: PHP, JavaScript, TypeScript, Python | Frontend: Vue.js, React, Angular, Tailwind CSS | Backend: Laravel, Node.js, Express.js | Data & App Framework: Streamlit | Database: MySQL, PostgreSQL, MongoDB | DevOps & Version Control: Docker, Git, GitHub | Languages: Indonesian (Native), English (Intermediate)
